

WEBSITE SECURITY & PERFORMANCE CHECK

WHAT YOU WON

You won a free Website Security & Performance Check. We will inspect one public website for common security warning signs and performance issues and send you the key findings.

WHAT IS INCLUDED

- One publicly accessible website/domain
- Non-destructive automated and manual high-level checks
- Security warning indicators, SSL/TLS basics and public exposure checks
- Basic performance observations and recommendations

PRIZE TERMS

- One website/domain only.
- Does not include source-code repair, hosting migration, SEO work, penetration testing or remediation.
- Relytech will not intentionally exploit a discovered weakness.
- Results are point-in-time and may be affected by third-party hosting, CDN, plugins or application changes.
